

## DYLAN LARRIVEE

**PERSONAL SUMMARY** I am a highly motivated software engineer who is looking to move out of my current technical consulting role and into a full-time developer position. In my professional career, developing custom solutions for marketer's needs has allowed me to work with many types of technologies within the martech industry. I have a strong passion for technology and am always looking for opportunities to supplement my learning through personal projects and multiple online learning resources that I am continuously engaging in.
